

Fitform® Thermoforming Bottom Webs for EO and/or Irradiation

ML PE

For Lightweight Disposables

ML PE - For Lightweight Disposables

ML PE is high performance polyolefin based formable bottom web intended for sterilization by EO gas. Ideal for packaging lightweight medical devices.

Technical Details

- PP/PE multilayer film
- 80-180 microns

Benefits

- Excellent formability and runnability
- Good optical properties
- High puncture resistance and mechanical strength.

Applications

- Sealable and peelable with wide range of uncoated and coated papers as well as with PE sealing layer
- For packaging of syringes, connectors, needles, catheters and other lightweight medical devices
- For EO sterilization
