

Thermoforming Bottom Webs for EO and/or Irradiation

SK EL

Highly Transparent Thermoformable Film

SK EL - Highly Transparent Thermoformable Film

SK EL is general thermoforming packaging material for wide range of medical devices. It can be sealed to coated papers, coated Tyvek®, and polyethylene based films.

Technical Details

- Coextruded PE/PA/PE film
- 75-300 microns

Benefits

- Excellent formability and cutting properties for easy packing process
- Outstanding clarity to get good looking packages

Applications

- For packaging of syringes, connectors, needles, catheters and tubing
- Sealable with coated papers, coated Tyvek® and polyethylene based films
- For EO and Irradiation sterilization

DuPont™ and Tyvek® are trademarks of DuPont de Nemours, Inc.
