

Medical Papers

Excellent sealing and peeling properties
with Wiicare films

Medical Papers

Different grades of medical papers are used as lidding materials both on thermoforming and flat pack machines, to enable penetration of the sterilisation agent (gas or steam) into the pack.

Wiicare product range includes a wide selection of papers especially developed to give clean peel with Wiicare's films.

Medical Papers and Tyvek®					
Product code	Coating	GSM	Sterilization method	Primary sales region	Description
Gas Paper	Uncoated	60	EO, IR	Europe, Africa, APAC, Americas	An economical grade with good seal and peel properties.
Gas Paper	Uncoated	70	EO, IR	Europe, Africa, APAC	An economical grade with good seal and peel properties.
Gas Paper HP	Uncoated	60	EO, IR	Europe, Africa, APAC, Americas	An improved grade with higher seal strength.
Gas Paper HP	Uncoated	70	EO, IR	Europe, Africa, APAC	An improved grade with higher seal strength.
Gas Paper HS	Uncoated	80	EO, IR	Europe, Africa, APAC, Americas	An improved grade with higher seal strength.
Gas Paper FourSS	Light Coated	63	EO, IR	Europe, Africa, APAC	A treated paper grade designed as an alternative to coated papers for better economy.
Gas Paper LC	Light Coated	83	EO, IR	Europe, Africa, APAC	A stronger quality, treated paper grade designed as an alternative to coated papers for better economy.
Lacquered paper	Coated	70, 74, 110	EO, IR	Europe, Africa, APAC	Grid lacquered paper grade for applications where totally clean peel and/or a visible opening pattern for visual quality check purposes are required.
Tyvek®	Uncoated	59.5, 74.7	EO, IR	Europe, Africa, APAC	DuPont Tyvek® 4058B 2FS and Tyvek® 1073B
Coated Tyvek®	Coated	71, 86	EO, IR	Europe, Africa, APAC	Coated Tyvek® 4058B and 1073B
Steam Paper	Uncoated	60, 100	Steam	Europe, Africa, APAC	Economical quality with good seal and peel properties.
Steam Paper HS	Uncoated	60	Steam	Europe, Africa, APAC	Improved quality with higher seal strength.
Steam Paper HP	Uncoated	70	Steam	Europe, Africa, APAC	Improved quality with higher seal strength.
Steam Paper HD	Uncoated	100	Steam	Europe, Africa, APAC	Improved and stronger quality with very good seal and peel properties.
HS = High Seal, LC = Light Coated, HP = High Peel
