Wiicare® FitSteam™ Steam Sterilizable Thermoforming Bottom Webs

## PPP

Pure Polypropylene Film

# PPP - Pure Polypropylene Film

Wiicare® PPP is a high-performance multilayer bottom film made from polypropylene. It offers an economical solution for various applications.

## Technical Details

- Coextruded PP film
- Available in thicknesses of 80, 100, 120, 150 and 200 microns

## Benefits

- High puncture resistance and mechanical properties with tear opening features
- Non-curling symmetric structure
- Outstanding clarity and good runnability

## Applications

- Sealable with uncoated papers and other webs with a PP sealing layer
- Ideal for packing bandages and other cotton based wound care dressings
- Economical film for low-cost medical devices
- Suitable for overwrap applications with tear opening (e.g. with OPP) where oxygen barrier is not required
- Compatible with steam and EO sterilization
